## VALUE-ADDED SOLUTIONS

### CHIC PASS

We collaborate with business partners offering a Digital Product Passport system capable of generating digital passports for your products. This system, designed as an electronic record platform, facilitates seamless tracking and trustworthy verification of a product across its entire lifecycle. From initial supply chain through to production, to end-users and eventual recycling, this system diligently monitors the product's journey. By ensuring authenticity and verifying declared features, the Digital Product Passport enhances reliability. Furthermore, it enables tracking of the product's environmental footprint and sustainability metrics, empowering comprehensive monitoring of its environmental impact.

Production of the product

Information obtained during the use phase according to the type of product

Sorting with artificial intelligence-based solutions

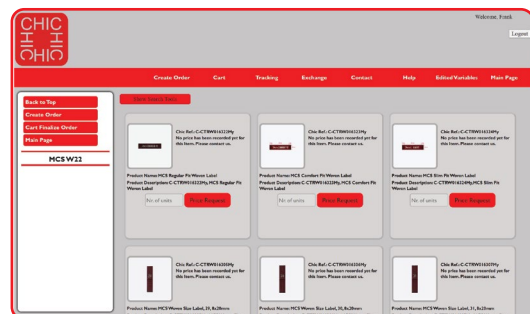

Obtaining recycled raw materials

Consumers are increasingly interested in the origins of their clothing. Through the Chic Pass system, you can seamlessly promote sustainability and share the narratives behind your products with your clientele. Through our collaboration with "Fairly Made," we offer the capability to generate digital passports for your products, enhancing transparency and trust.

## ONLINE CHIC ORDERING SYSTEM

We offer a user-friendly database system seamlessly integrated with our production units, simplifying the management of variable data for hangtags, care labels, and stickers swiftly, effortlessly, and securely. Our intuitive online web shop provides essential information and facilitates complex tasks such as data transfer and approval requests from brands. Moreover, it allows flexible adjustments to accommodate error corrections before production commences and provides brands with real-time monitoring of order statuses.
